

INFORMATION SECURITY POLICY

As Norm Holding, our goal is to;

- Ensure that the policies and standards of our information security management system are determined, documented, allocated and continuously improved in a way that fulfills the requirements of the ISO 27001 standards,
- Determine the developed security measures specific to the automotive sector supply chain and to ensure that customer requirements are met by applying basic information security controls,
- Ensure compliance with all legal regulations and contracts related to information security,
- Ensure the identification and systematic management of risks for business processes,
- Provide trainings that will develop technical and behavioral competencies in order to increase information security awareness,
- Ensure the organization's core and supporting business activities continue with minimal disruption,
- Maintain and improve the reliability of the organization by protecting the confidentiality, integrity and accessibility of assets,

and work with all our strength to become an exemplary organization with our leadership in terms of information security in the fasteners sector by managing our activities in an integrated and efficient manner together with the other management systems we apply.
